17 - 40 cm

Now also available
in size 2

SMILLA lasts a long time – growth adjustment can be done with an Allen key. The SMILLA's seat and foot plate can easily be adjusted in height via integrated aluminum profiles.

In order to meet the individual needs of the user, the angle of the seat and foot plate can be adjusted with an Allen key at an angle of (-) 5 °, 0 °, 7.5 ° and 15 °. Quick angle adjustments can also now be achieved using an innovative pull strap that is located on the underside of the seat base and foot plate.

SMILLA

The convenient seating aid for everyday use

The seat upholstery is available in many colours and can be customised if required. This is to allow SMILLA to integrate perfectly into your home environment. All wooden elements are made of high quality, varnished beech wood.

SMILLA can also be equipped with many accessories, such as hip support, headrest, abduction block and lateral support.
