

Now part of the **ILS** family

Product Range 2024/25

About Us

At ILS Kids (formerly Professional Assistance for Living), we pride ourselves on finding the right solution for each family – by delivering professional advice, outstanding clinical expertise and a specialised fitting service.

At ILS Kids, we are passionate about supporting children with additional needs to live life to the fullest and achieve their maximum potential. Through collaboration with families and treating therapists we supply assistive technology equipment for kids, giving them the best start to life.

We supply a large range of high quality equipment to provide children and young adults with a variety of options for mobility, therapy and postural support.

Our range includes products from leading brands across the globe, including Firefly, Jenx, Ormesa, Special Tomato and Smirthwaite to name just a few.

Our friendly team is here to help you and your family find the right solution and improve your quality of life.

We apply our expert knowledge and clinical focus to fully understand each child's needs and work with you to navigate the field of options and find the right solution for you and your family.

Our equipment is available for trial and is expertly fitted and customised to each individual.

For full product details about sizing, accessories and the latest additions to the range, visit www.pafl.com.au or follow our Facebook page.

A security and restraint harness for bus travel

NOTE: CAR SAFETY REGULATIONS

Care must be taken to comply with all the relevant legislative and regulatory requirements when looking at car safety devices.

Several special processes must be followed in SA before a special needs car seat can be used in a vehicle – including exemptions from the Department of Infrastructure and Transport.

Other safety devices such as specialised harnesses or buckle covers may also fall within the NDIS Commission's purview of restrictive practices. As such, some extra protocols may need to be followed before implementing any additional devices.

Therapy

A variety of aids to support a range of therapeutic activities – or just getting on with all that life has to offer.

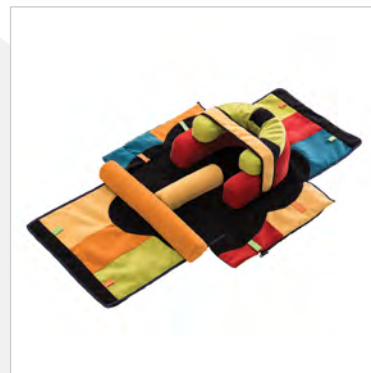

BACKPACK
